This is the home page.

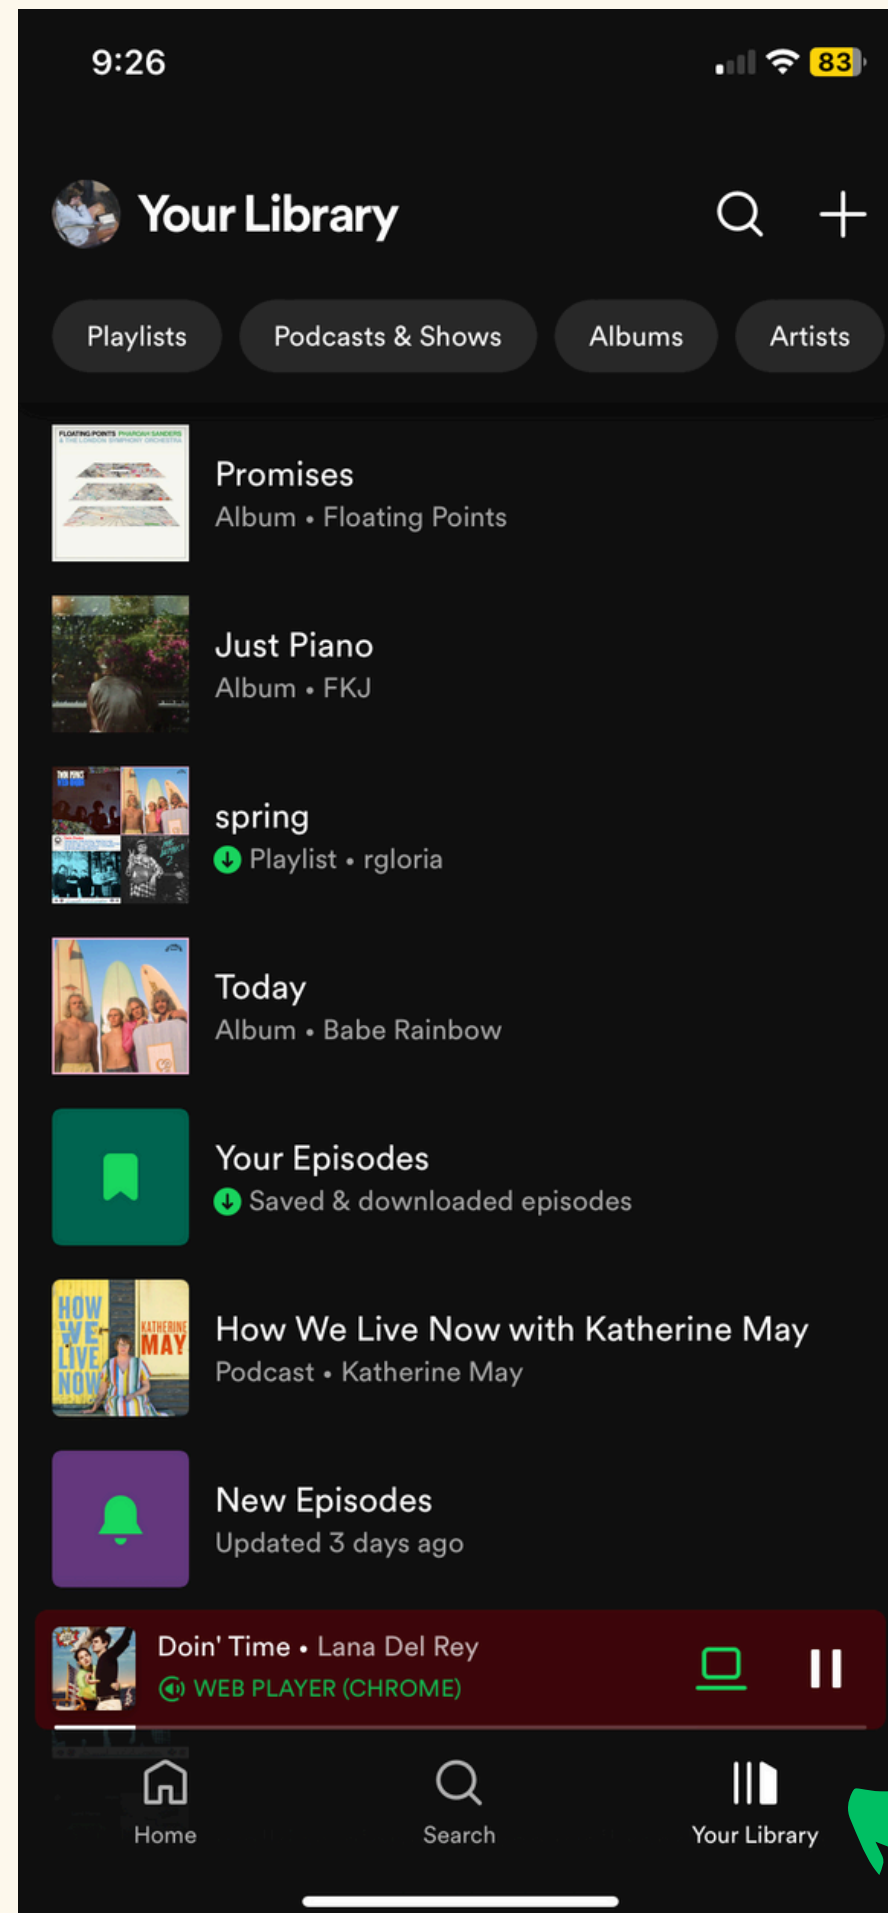

It's the first thing you'll see when you open the app.

Scroll down the page to see a mix of popular albums, recommended podcasts and music, and curated playlists made just for you.

Here's the home button

← Liked album

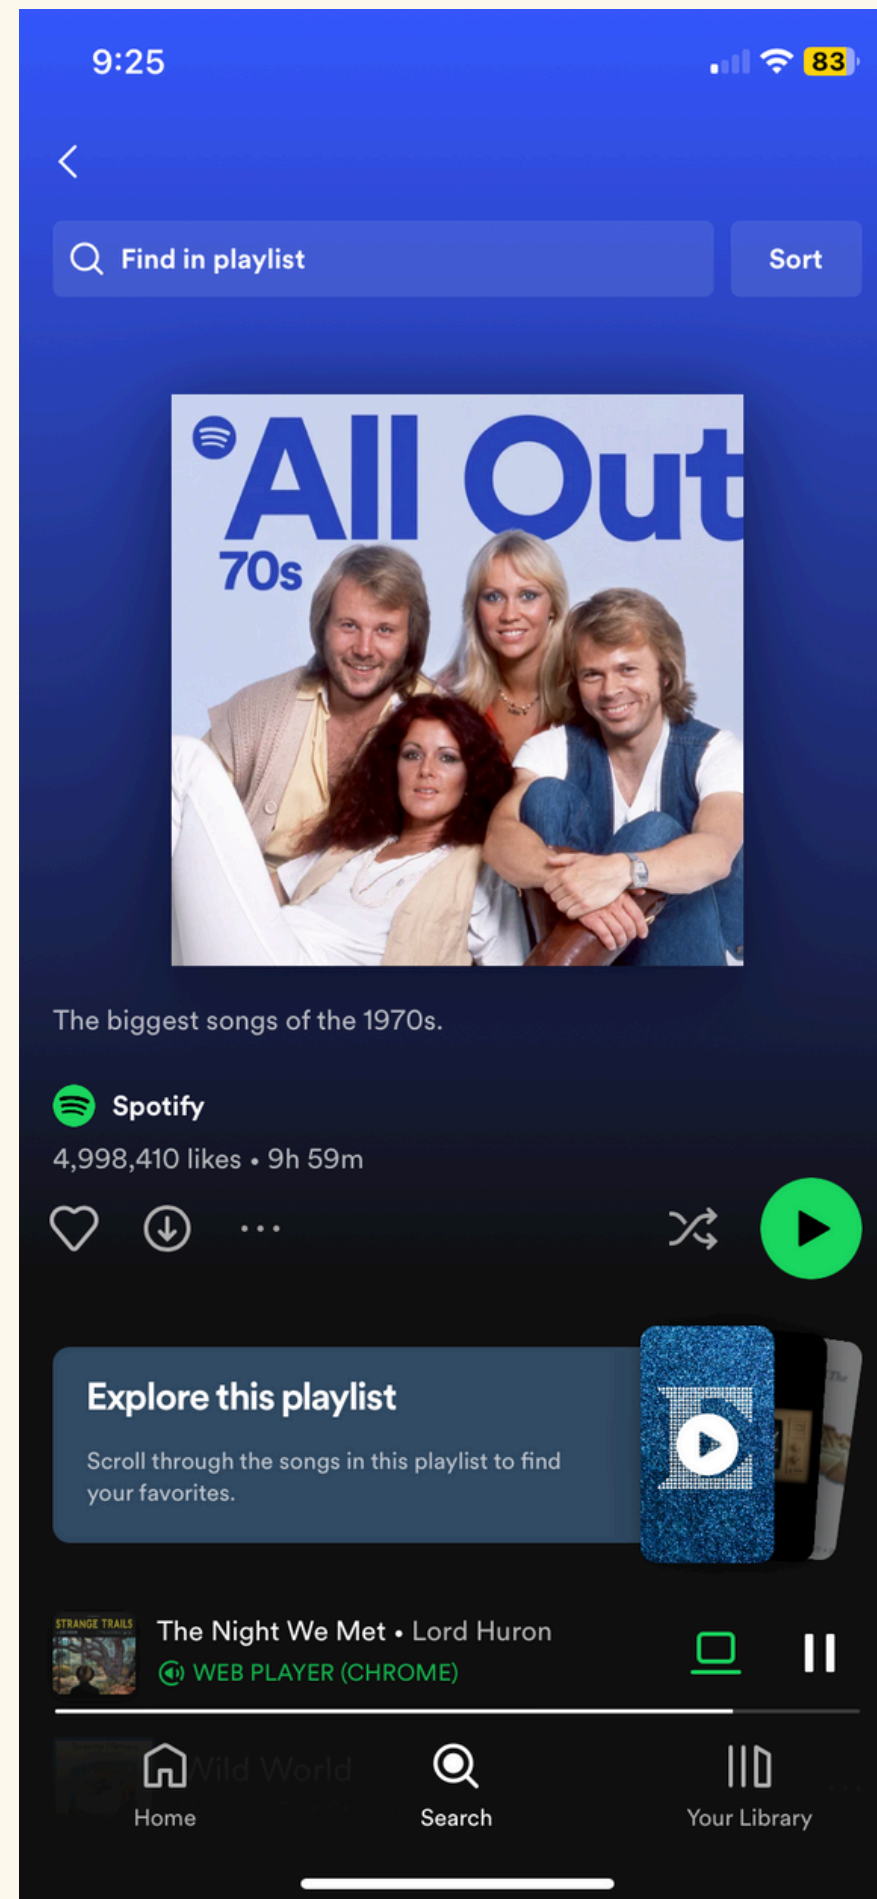

← Personal playlist

← Downloaded podcasts

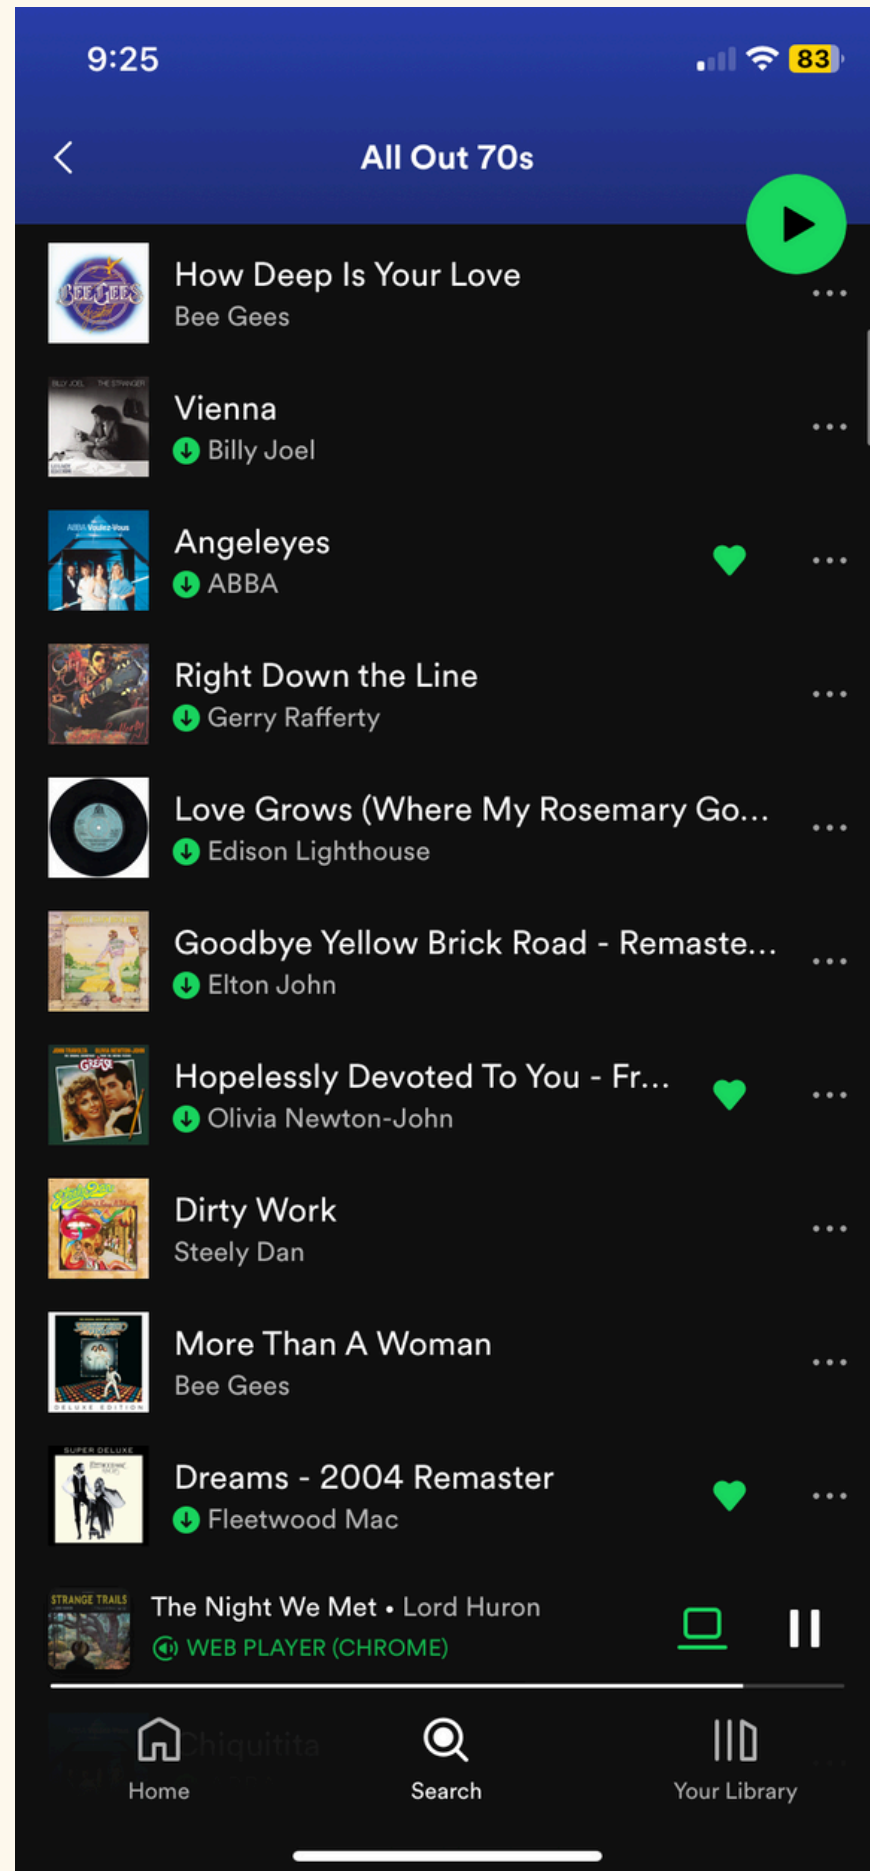

← The "Your Library" button brings you here.

**Find all your playlists,
liked songs, podcasts,
and downloaded
content here.**

Here's a
playlist I
found on
my home
page.

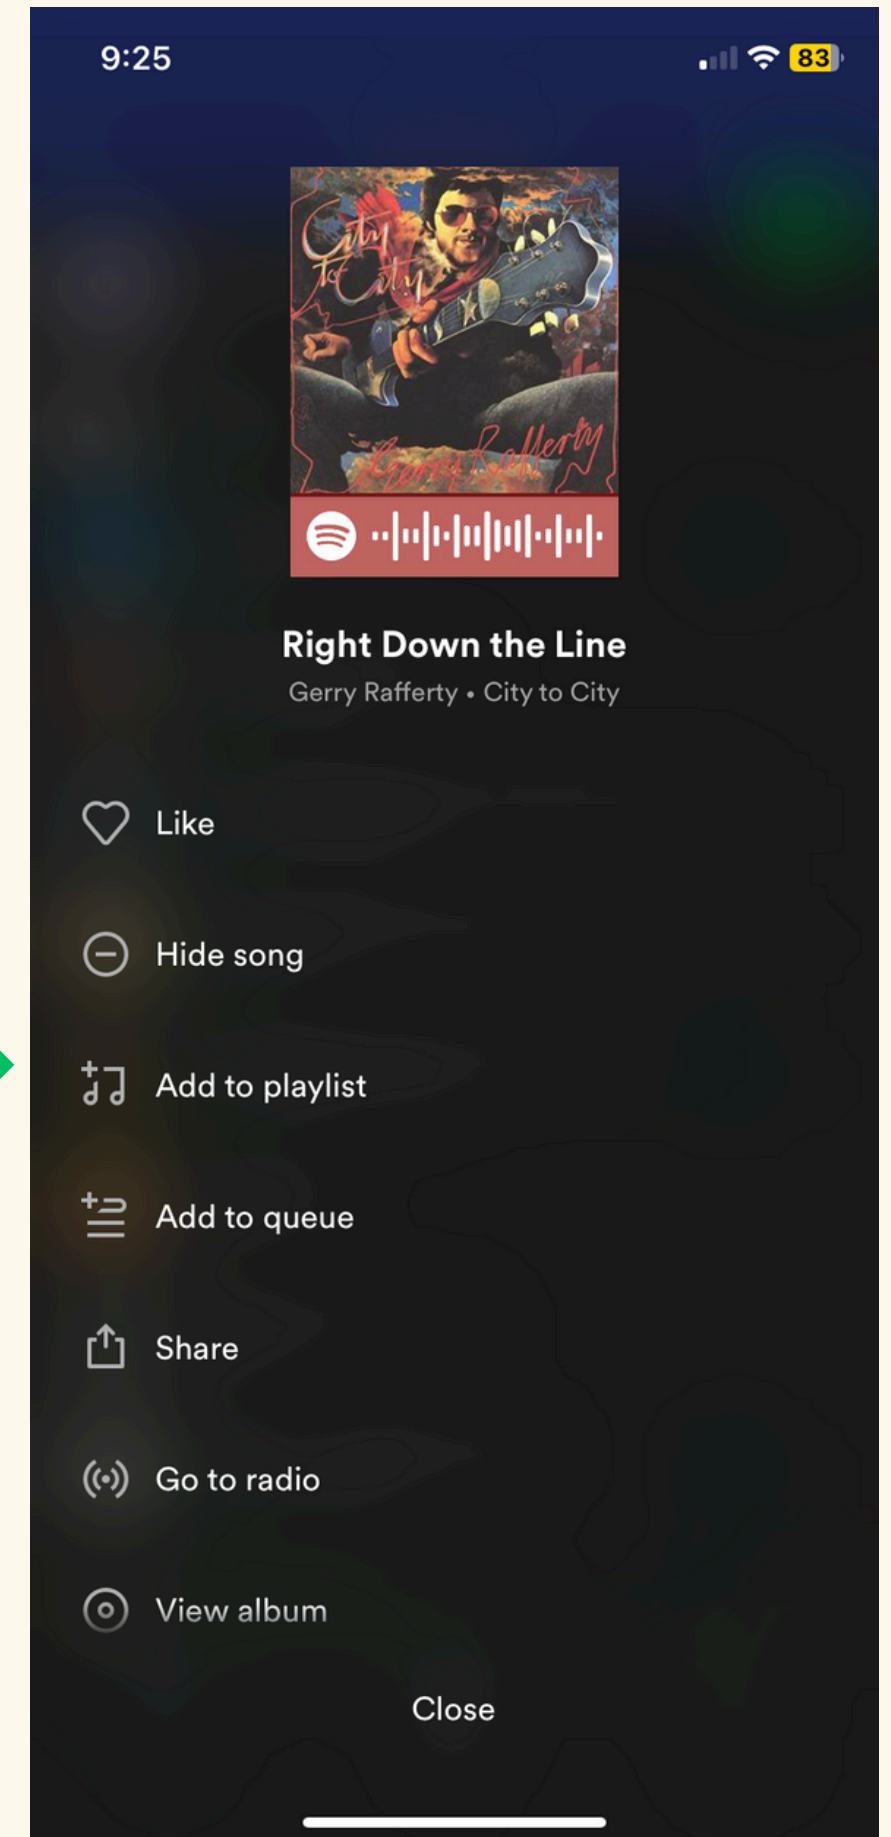

Let's find
a song
we like &
add it to a
playlist!

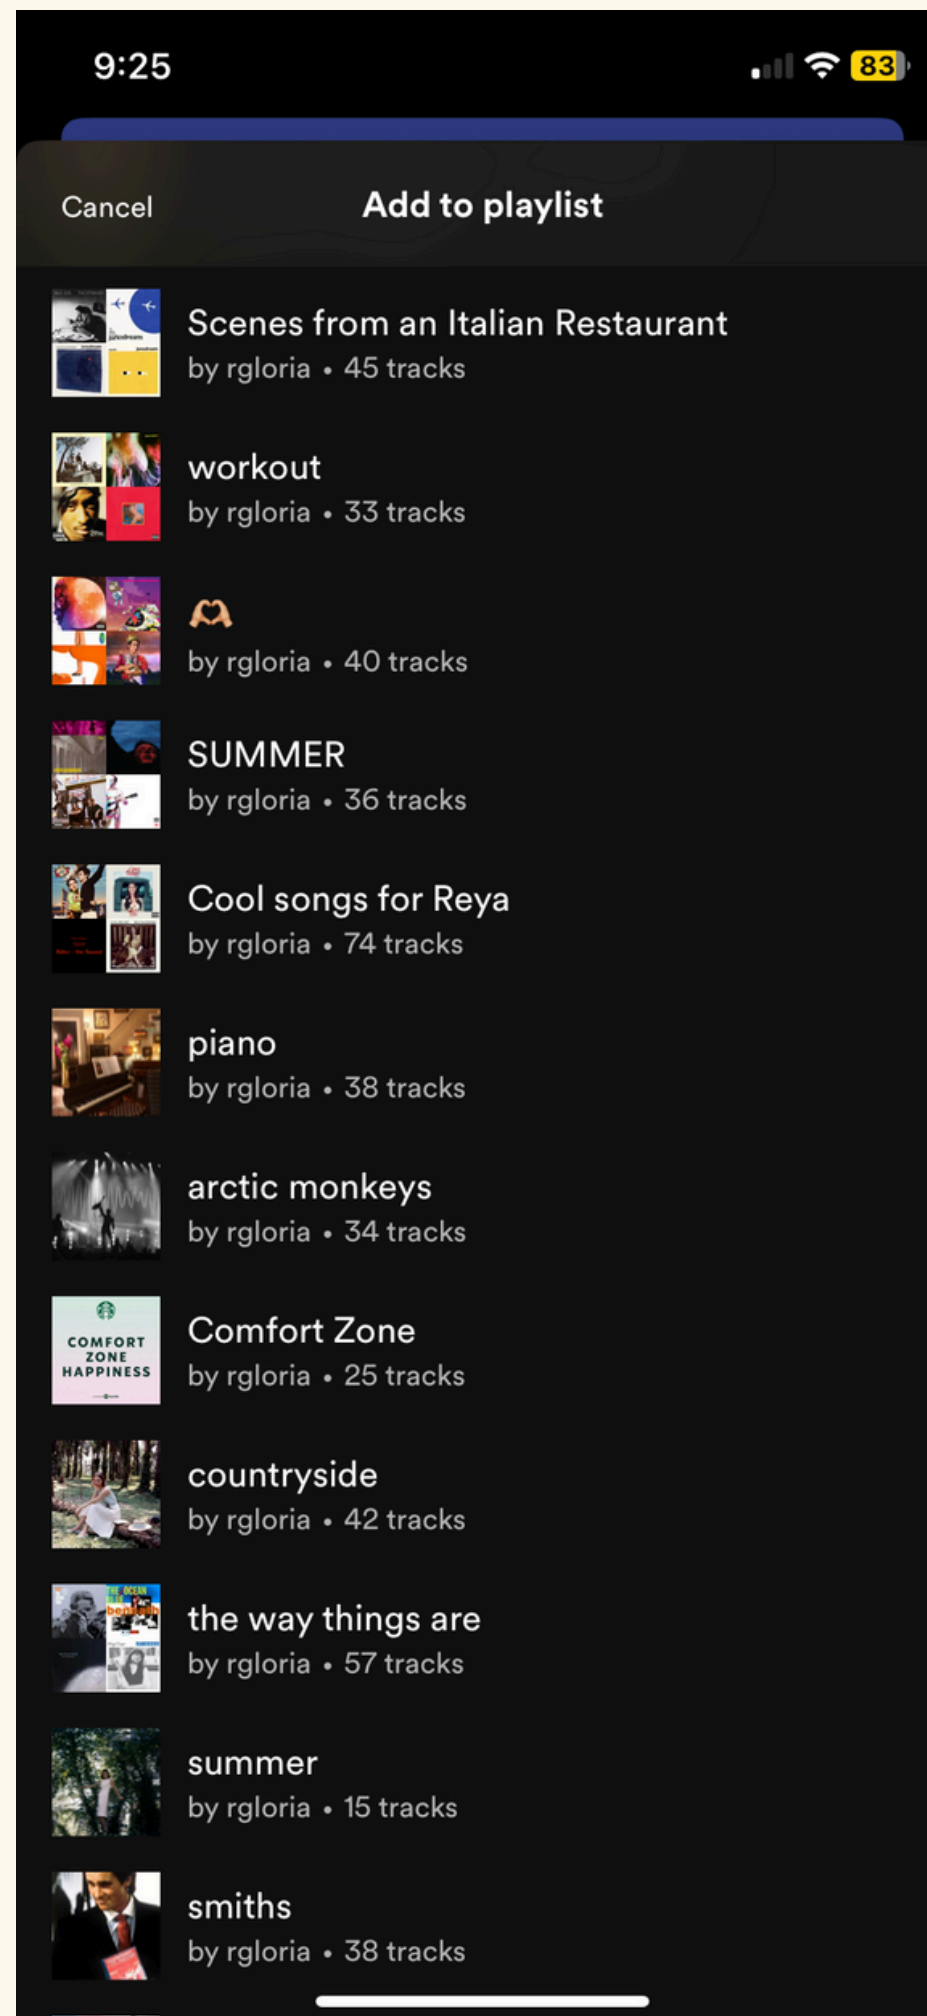

I want to add "Right Down the Line" to a playlist. First, click on the 3 dots to the side.

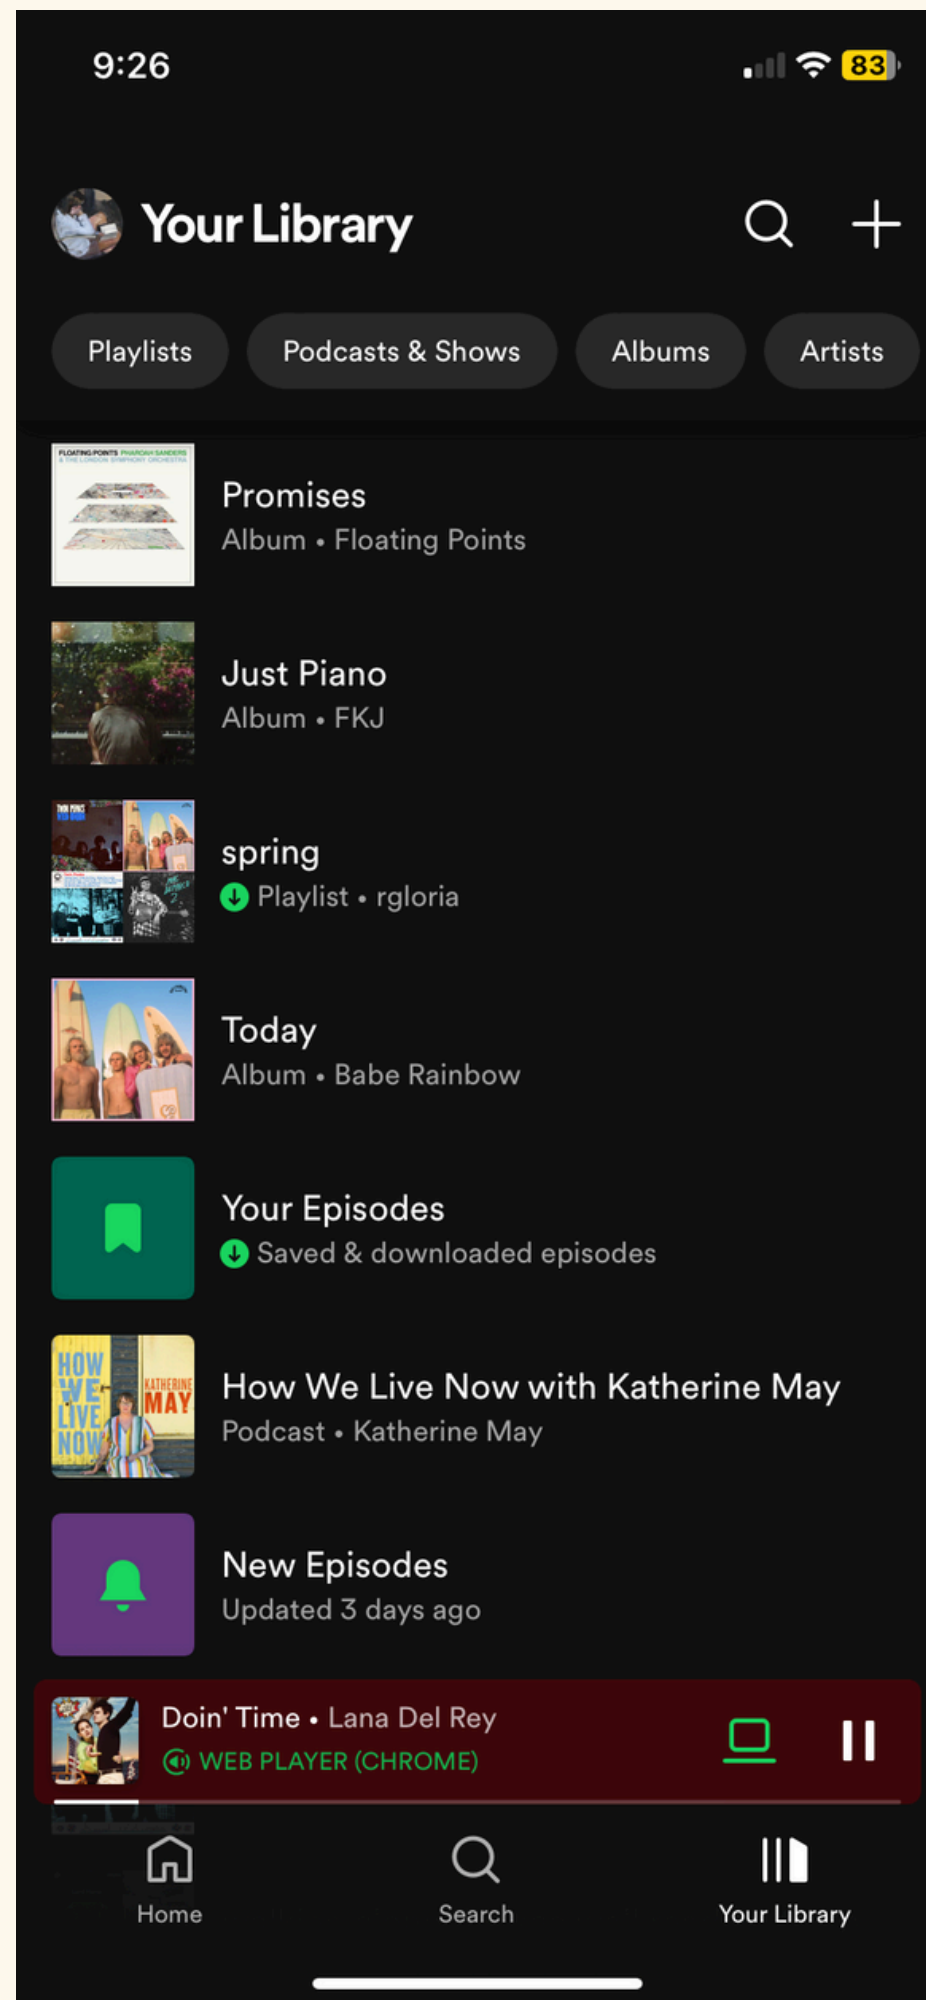

Then, click "Add to Playlist"

Then select one of
your playlists to add
the song to it!

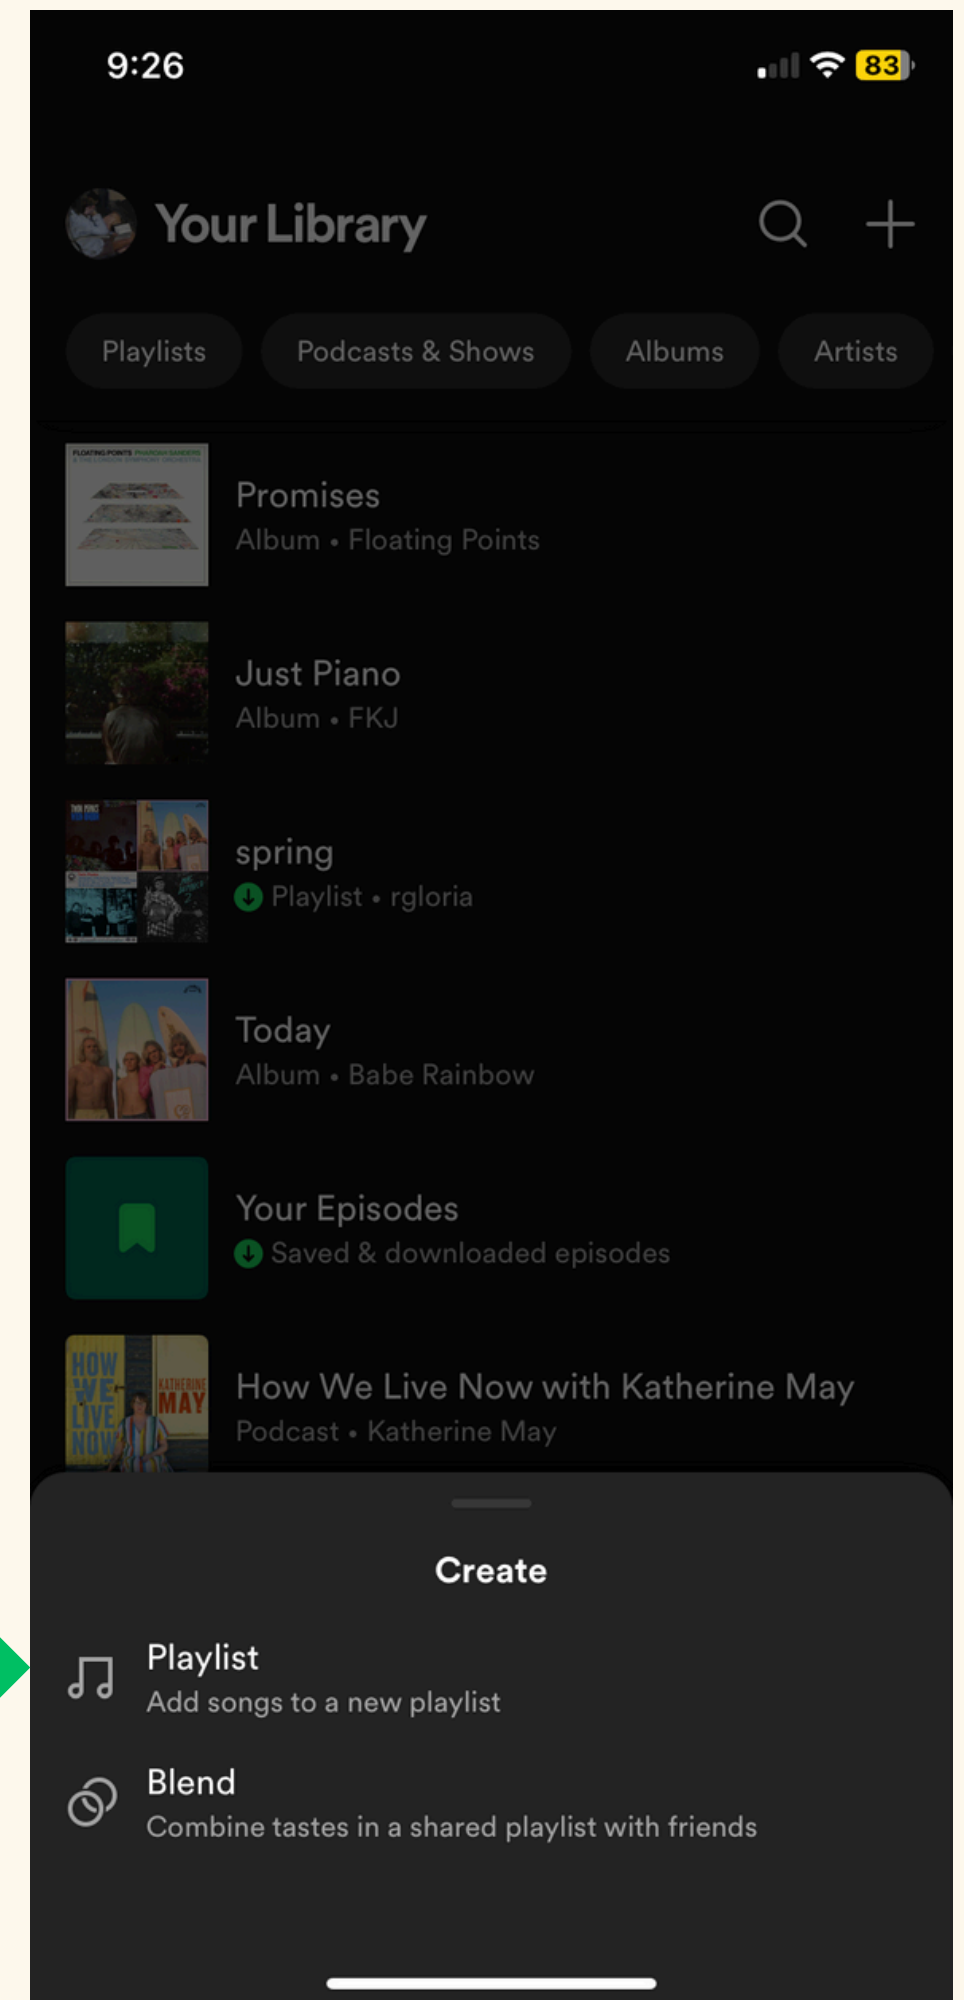

But how do you
make a playlist?

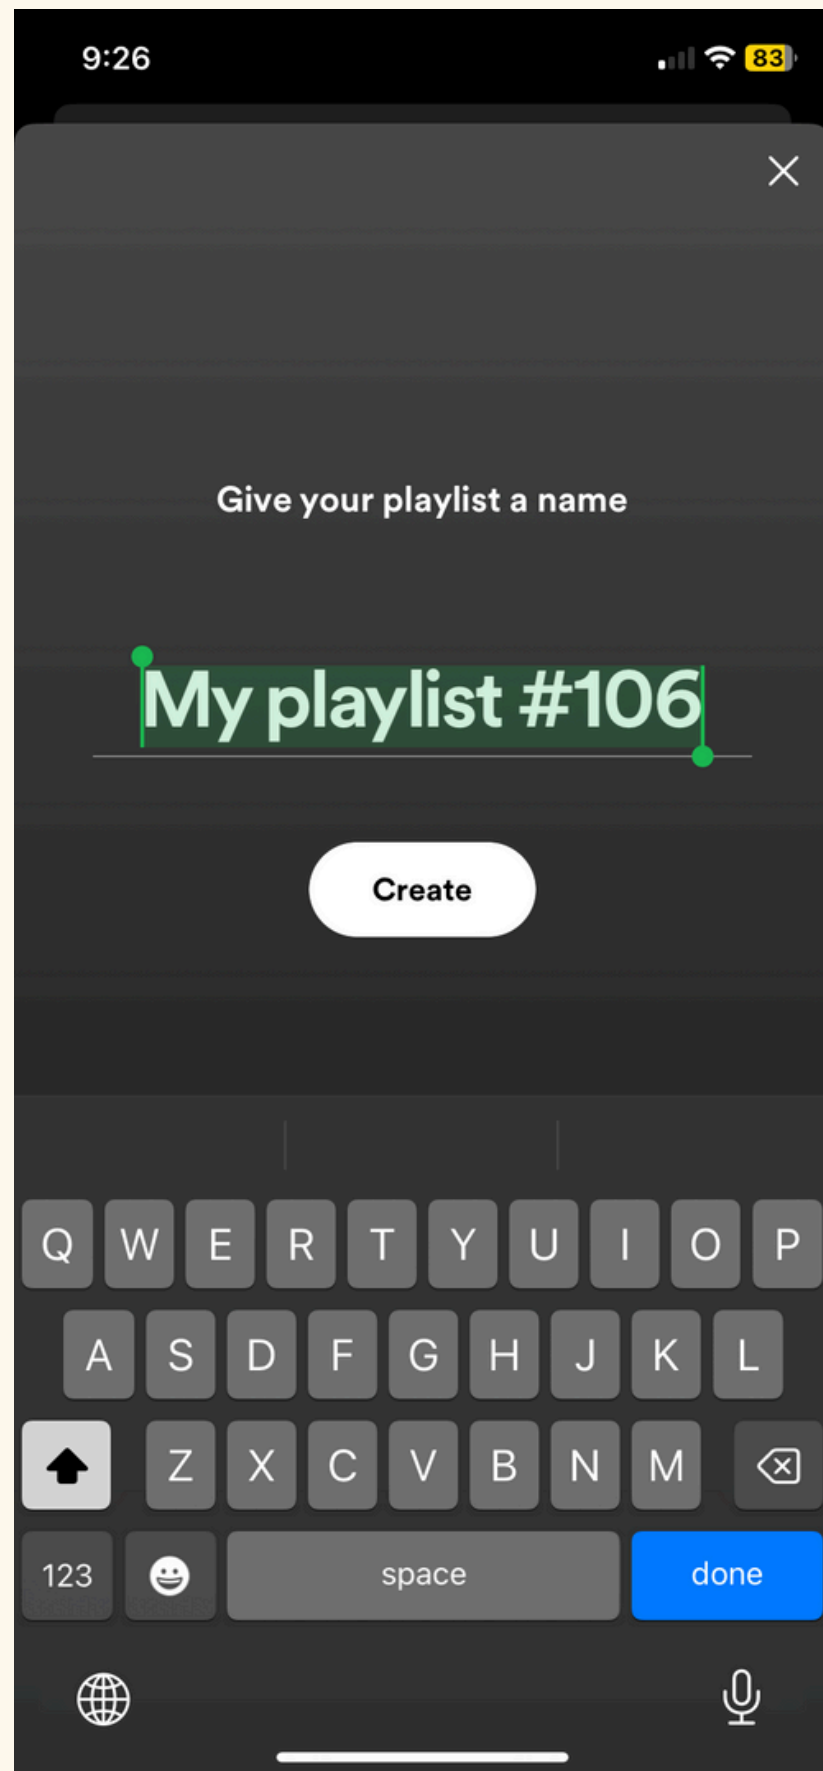

1. Press the + button

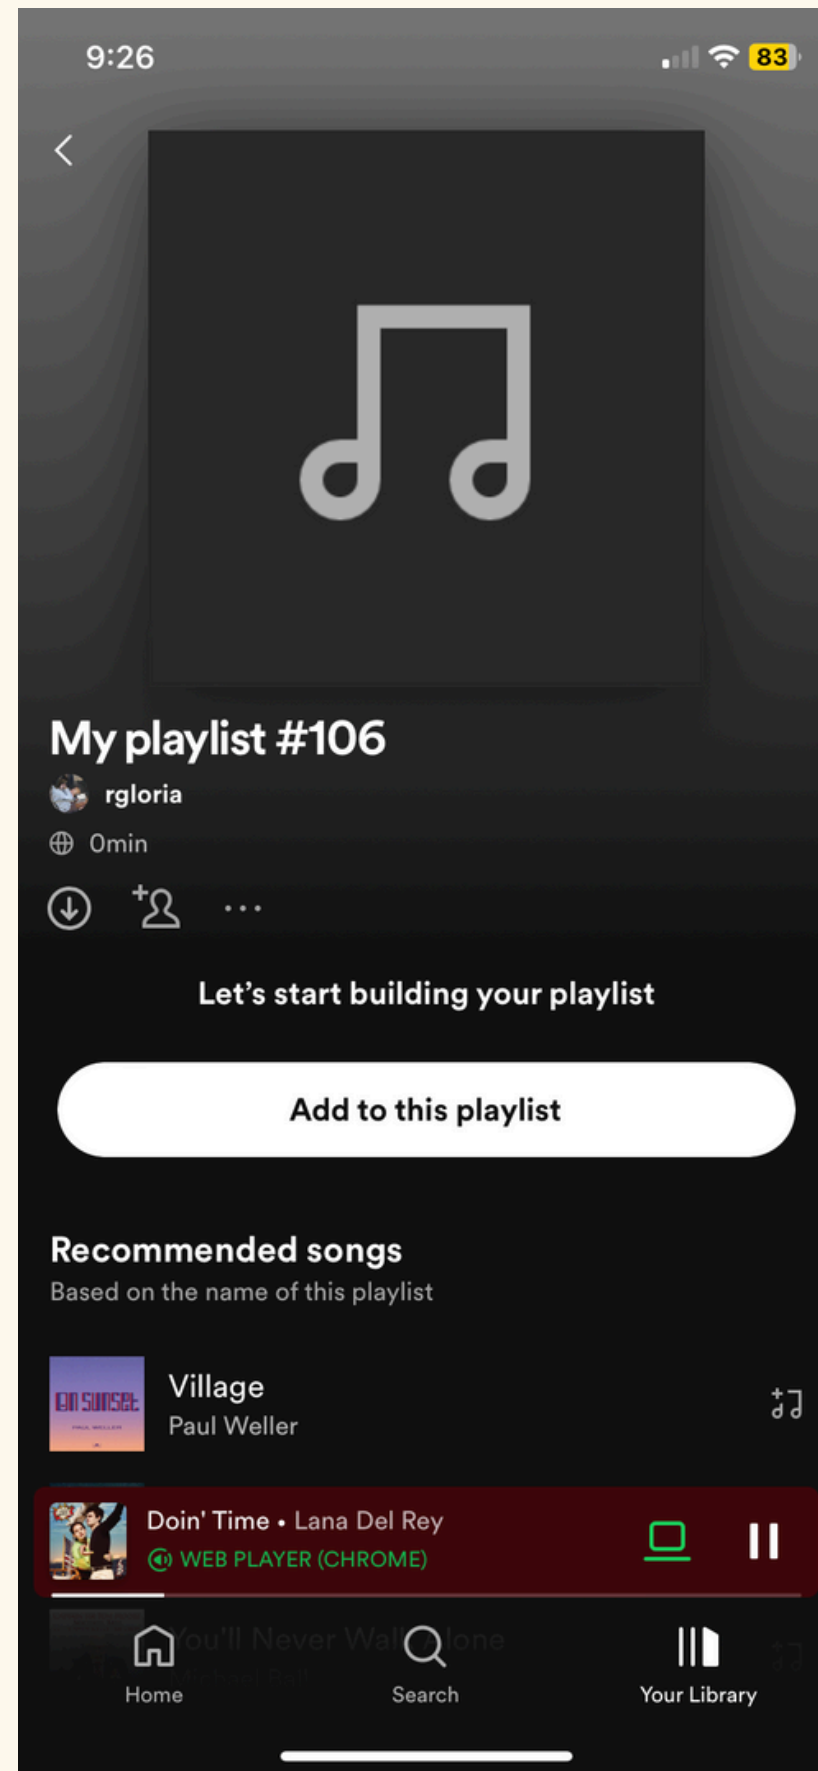

Return to the library page.

2. Click "Playlist"

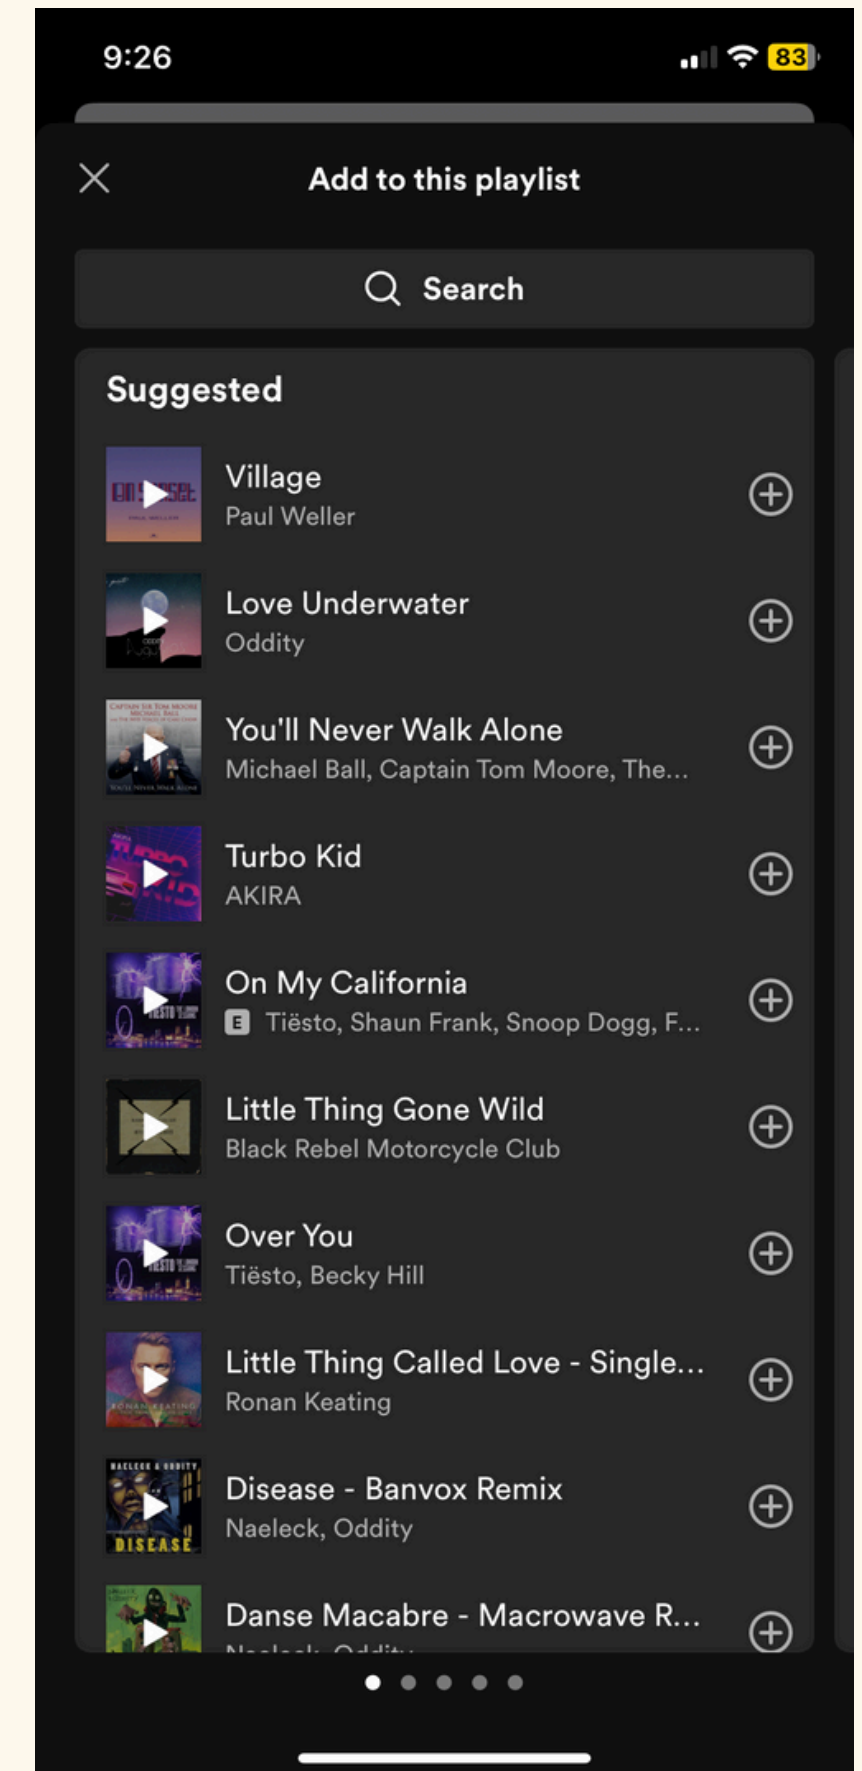

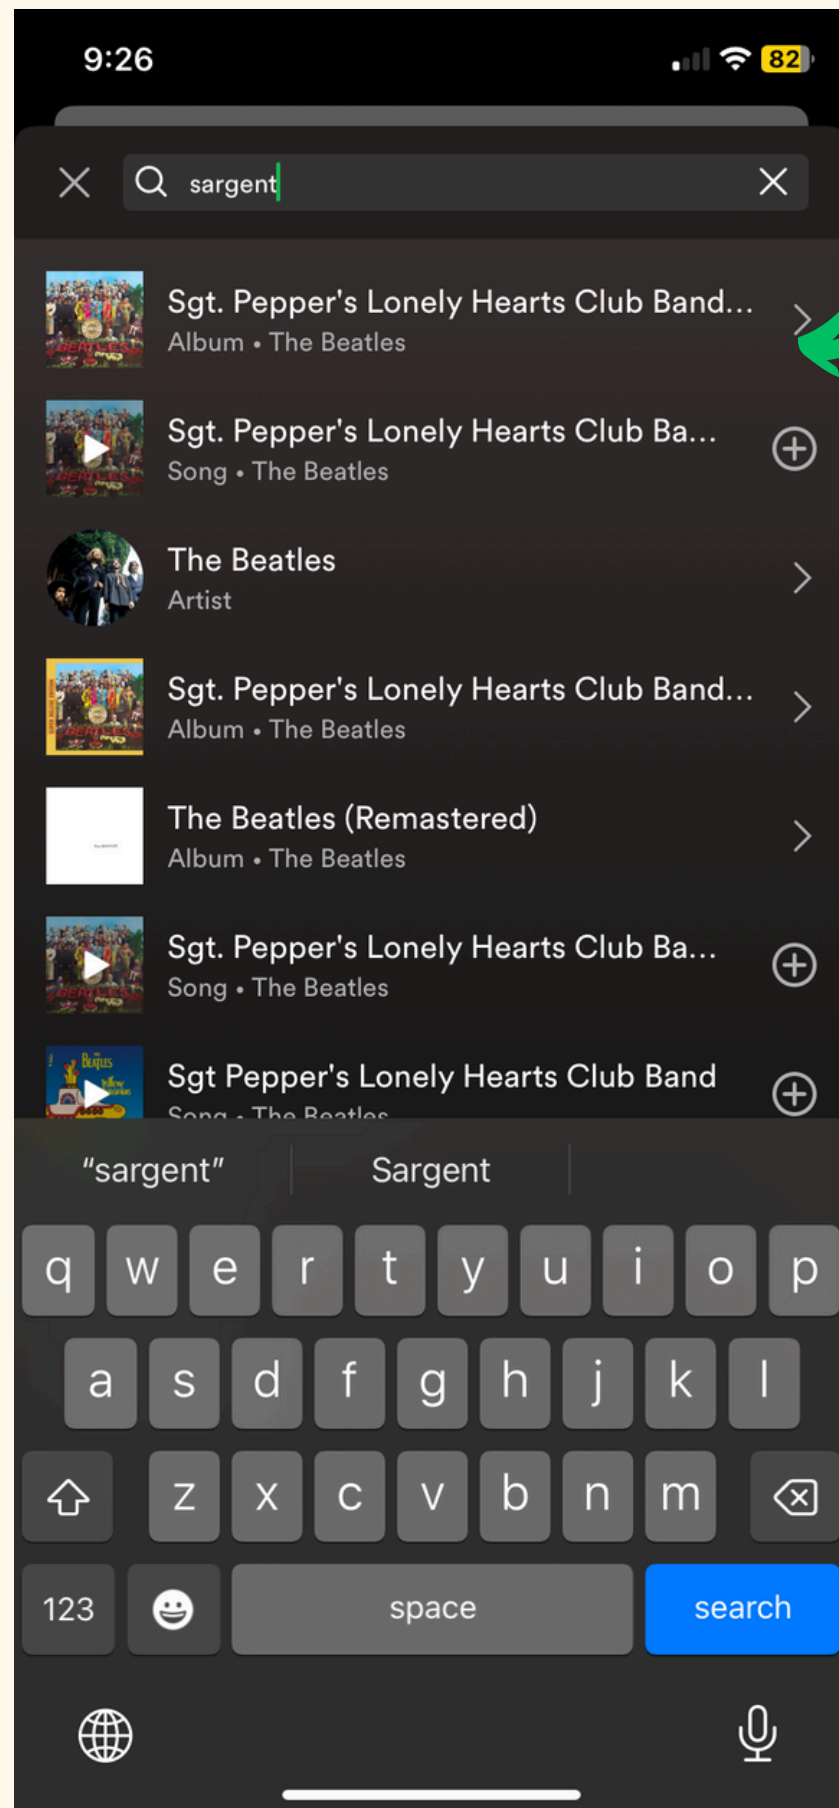

Give your playlist a fun name!

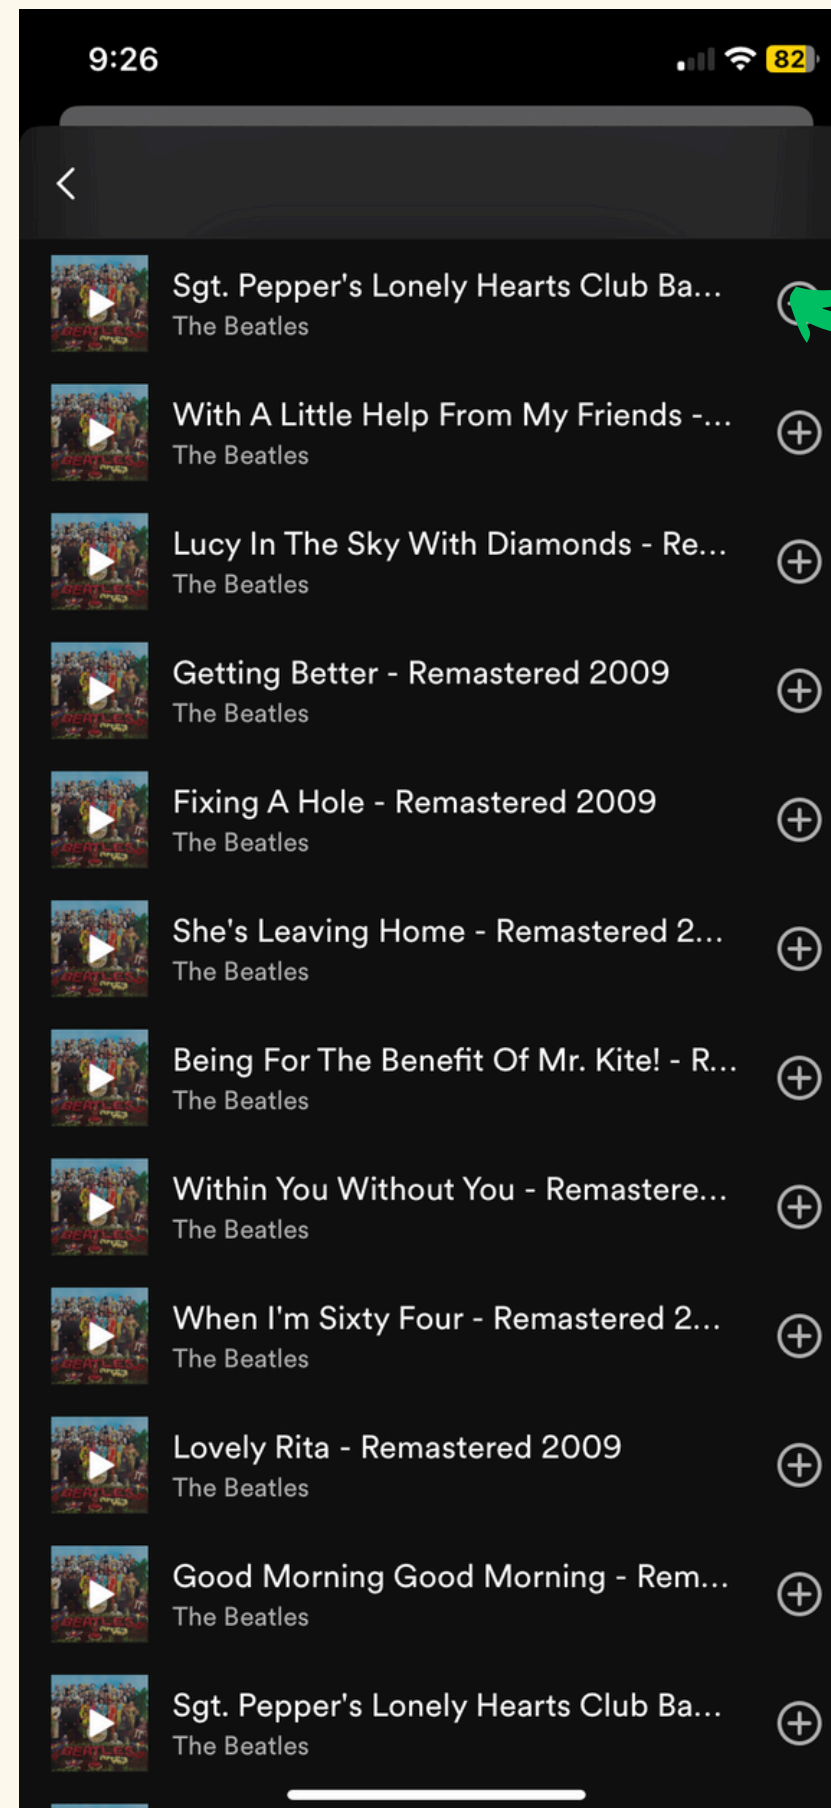

Now let's add some music. Click the white button here to add any song.

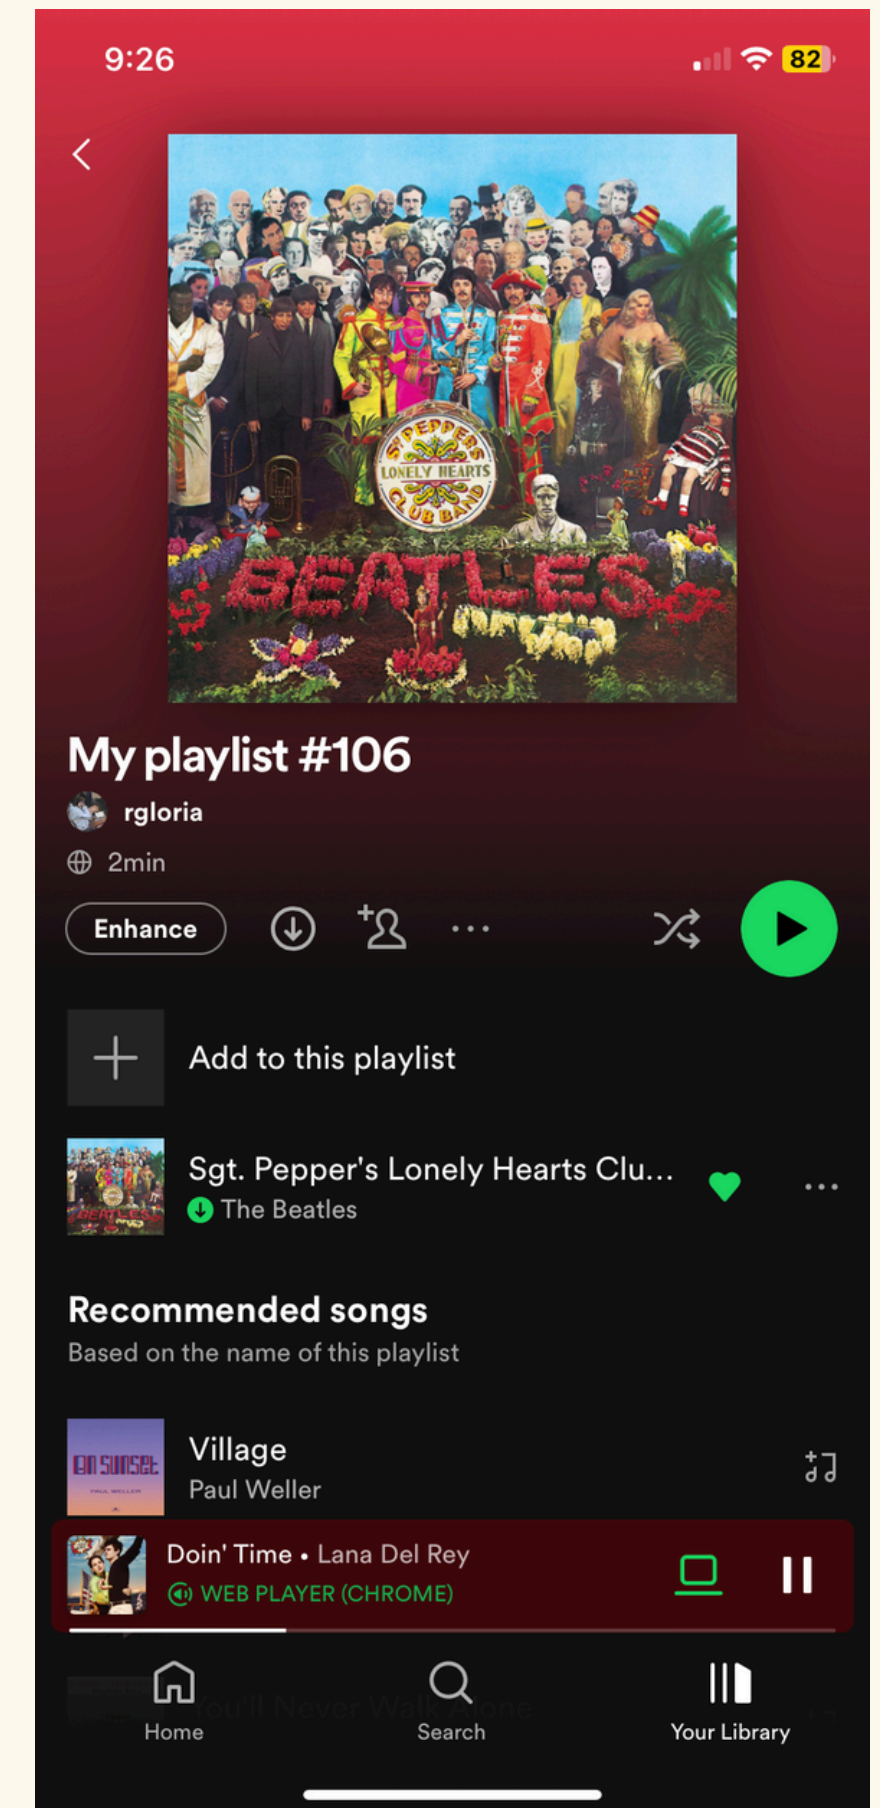

Tap the search button above to find your favourite tunes.

Here's the
album I'm
looking for

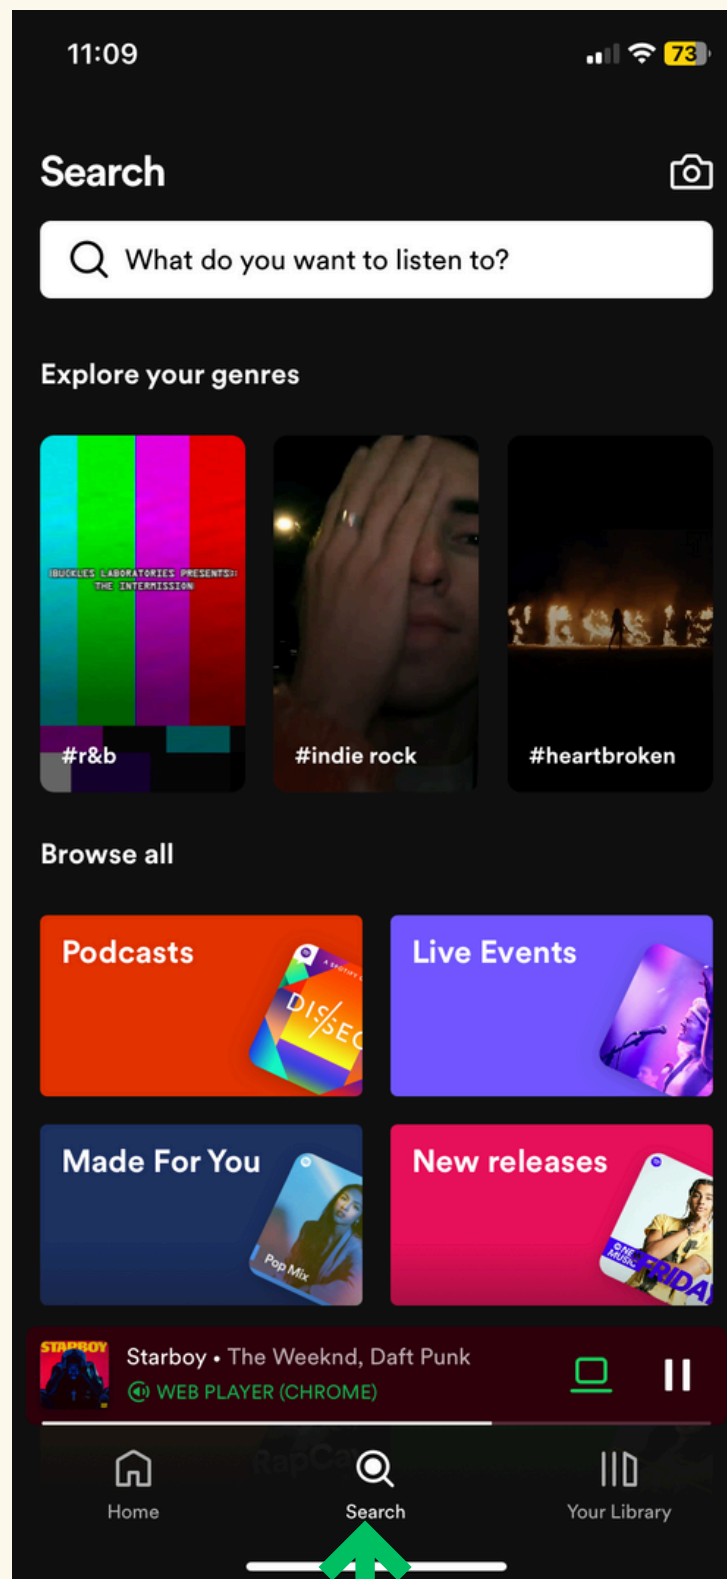

...and the
song I want!
Click the +
sign and it'll
show up on
your new
playlist.

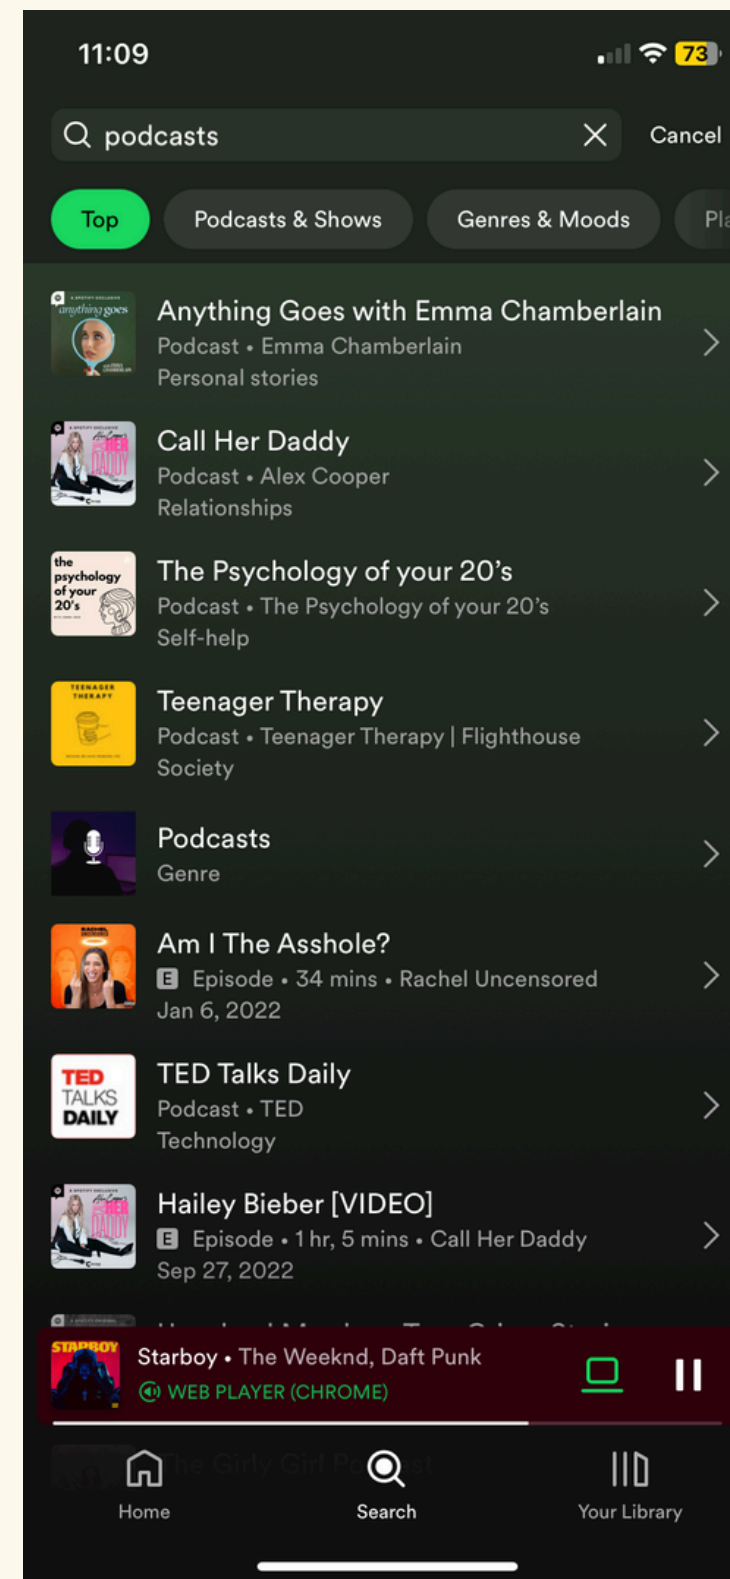

**How about
podcasts?**

It's the same process as adding music!

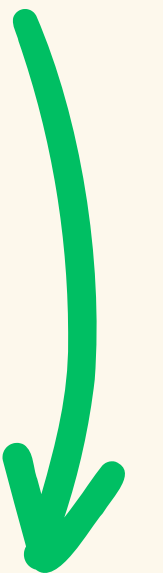

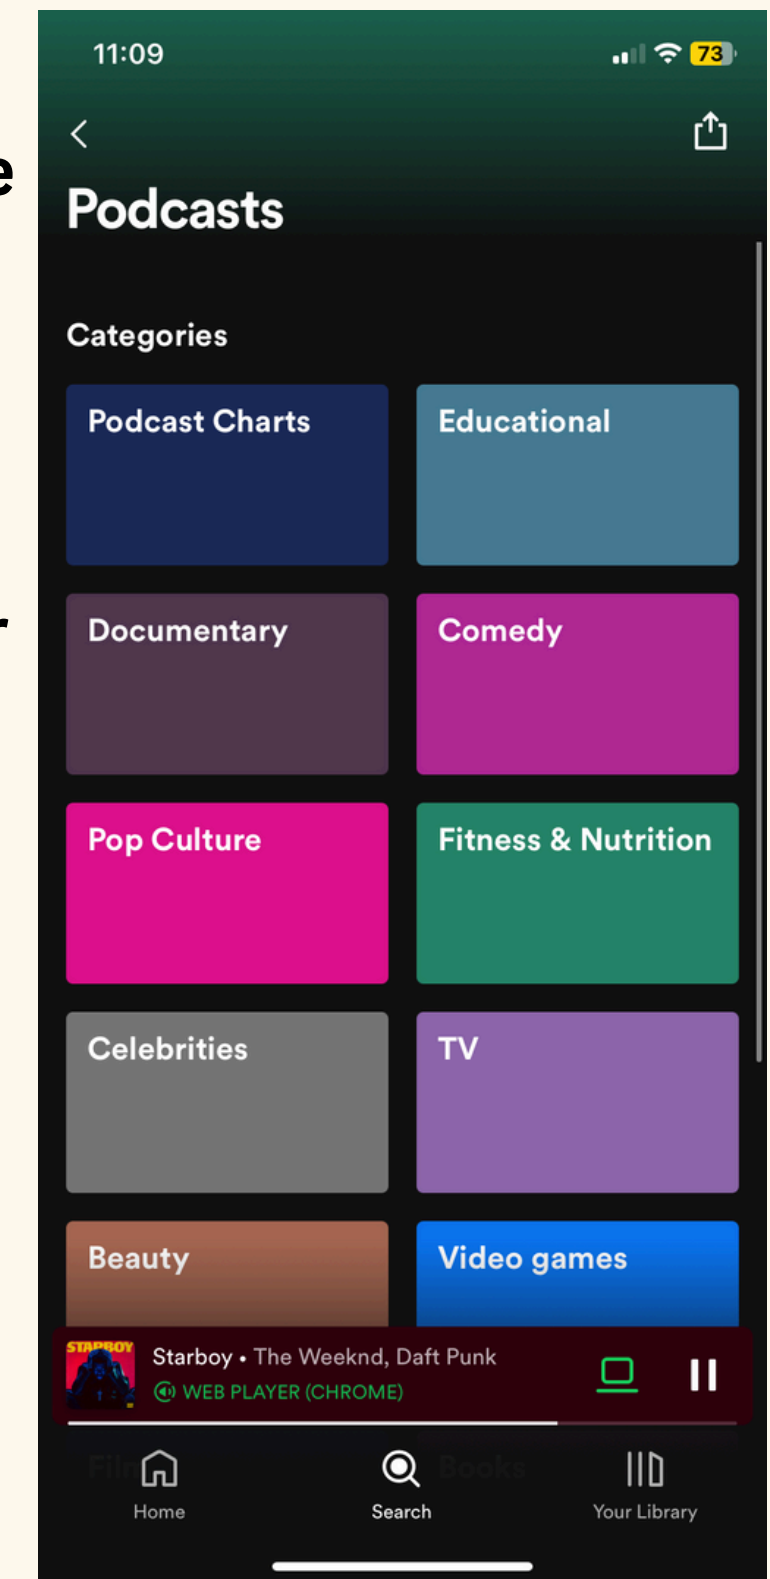

Use the search feature here

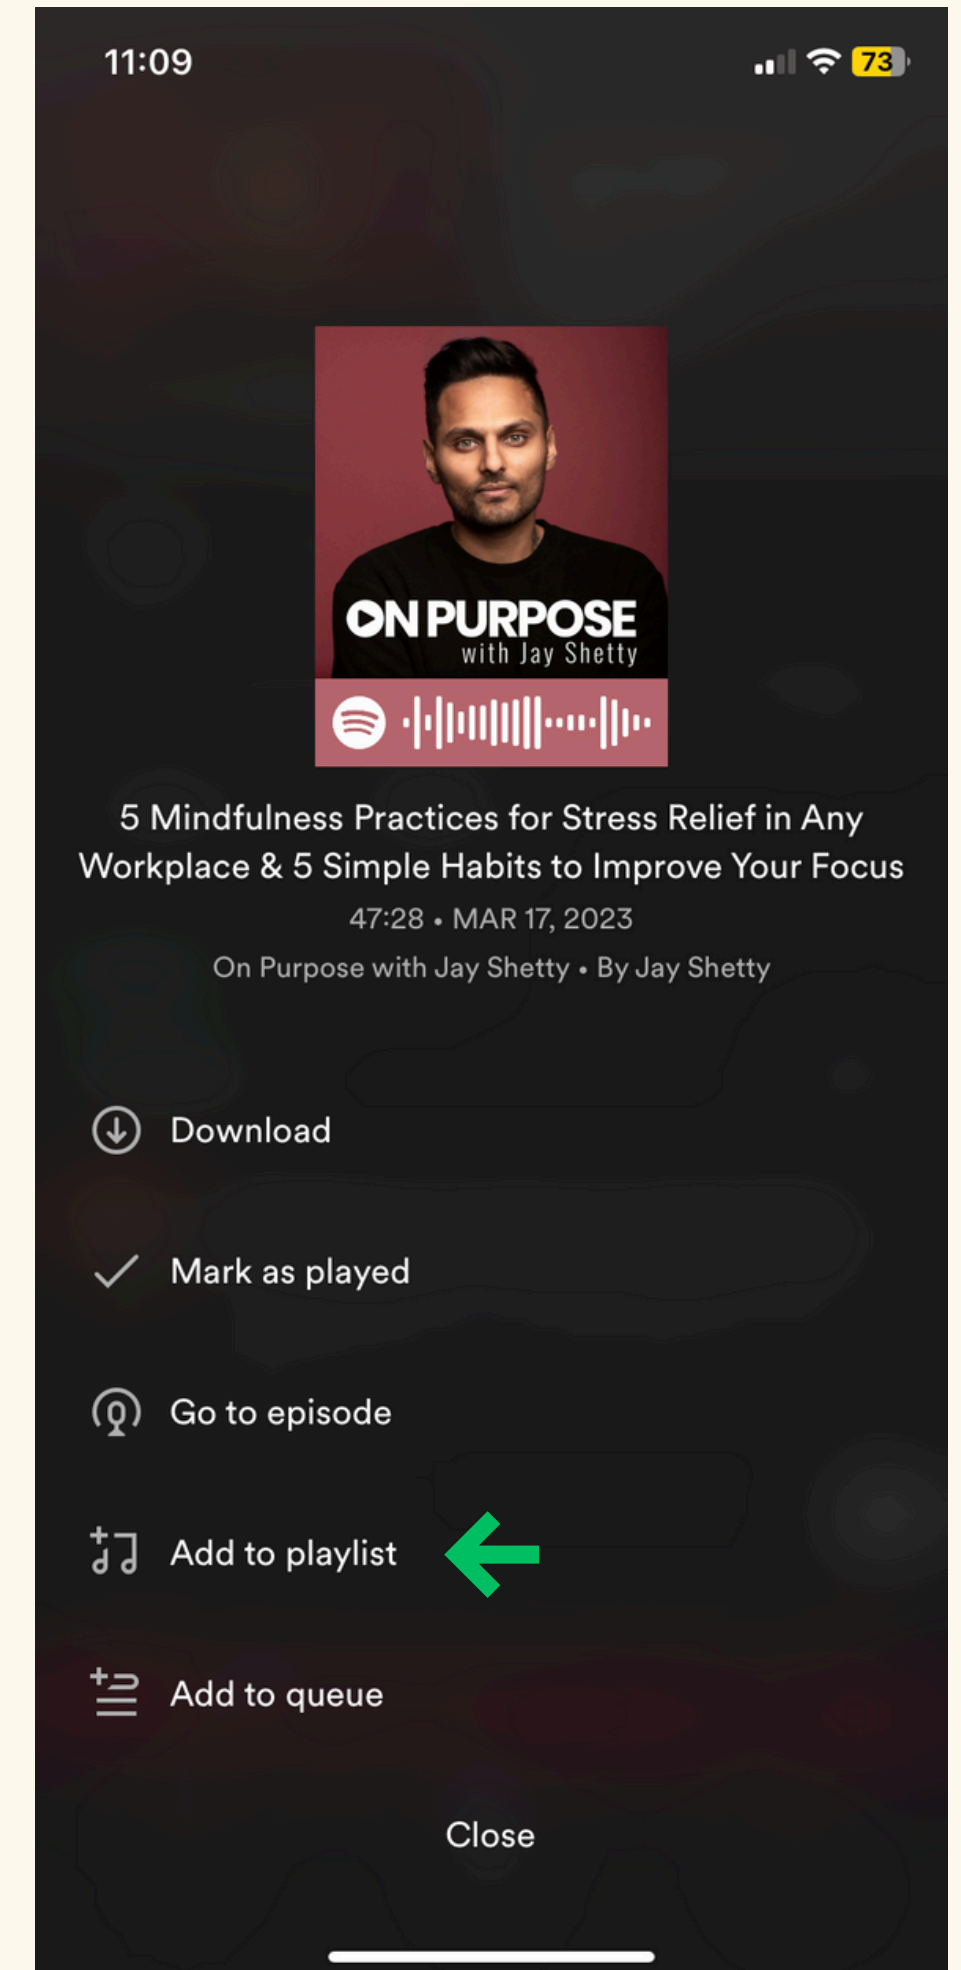

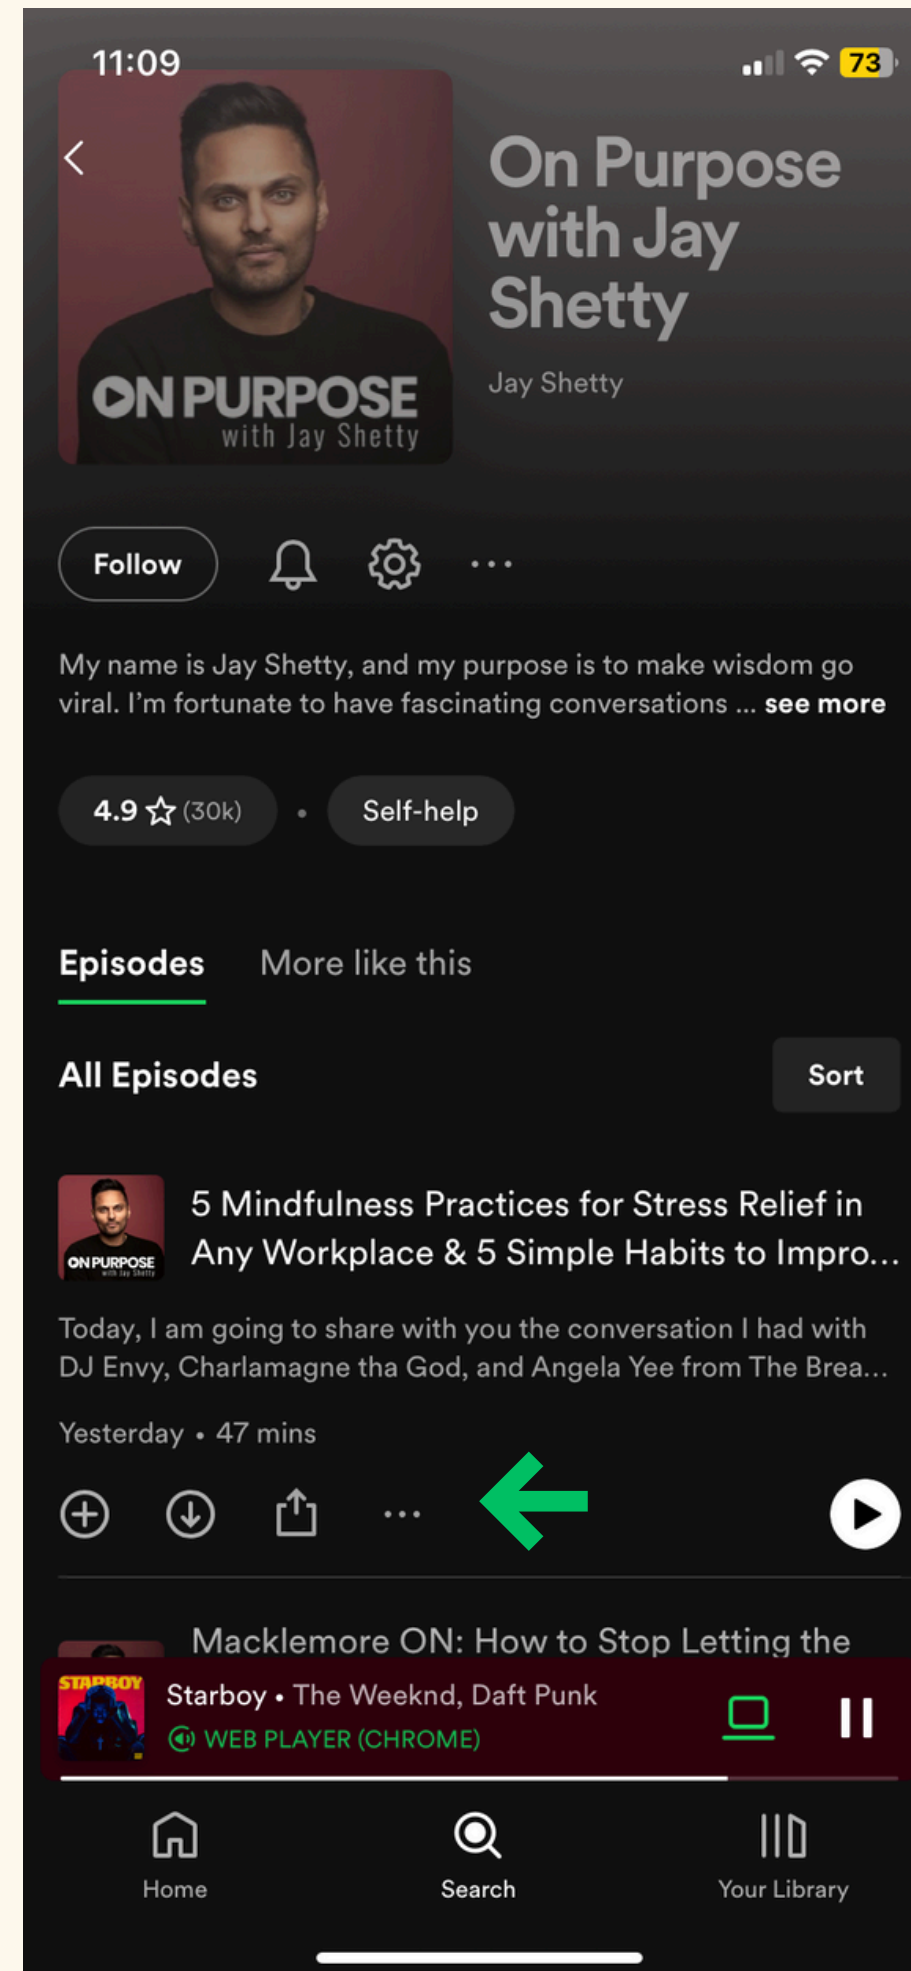

Search for "podcasts"

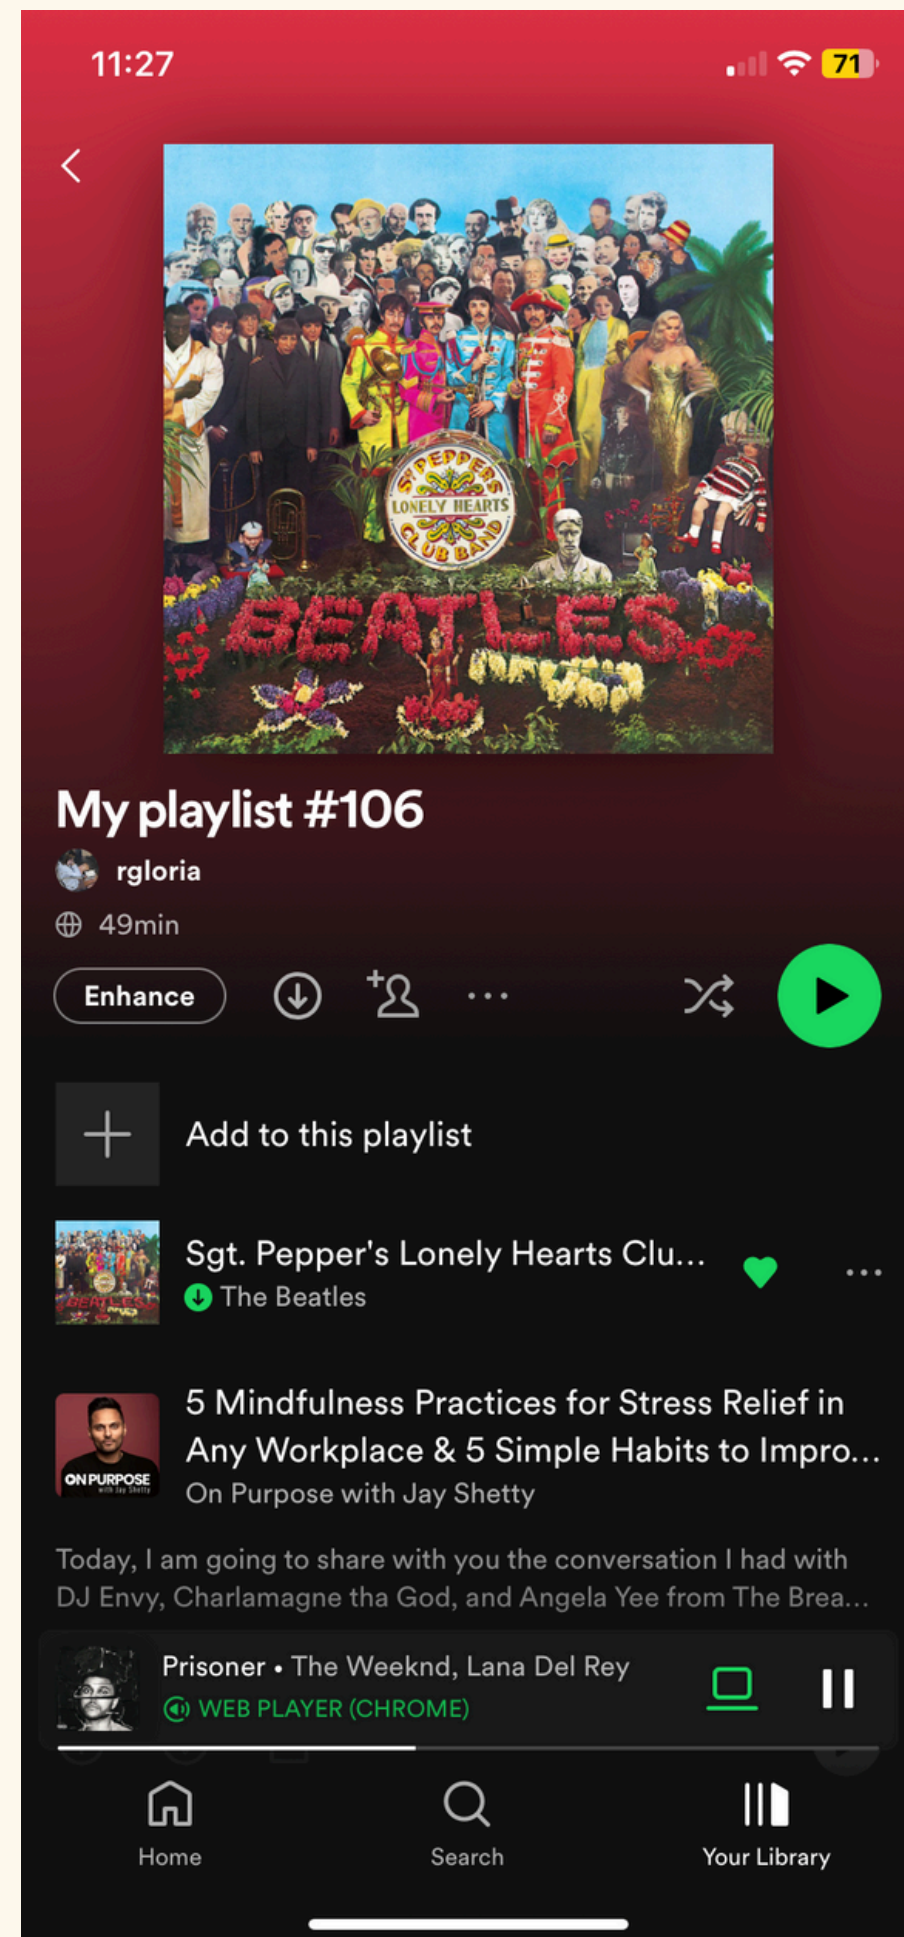

Click here to explore a wide variety of podcast genres. There's something for everyone!

Scroll!

- The three dots allows you to add the podcast to a playlist
- The arrow pointing UP lets you share the podcast with others
- The arrow pointing DOWN downloads the episode, so you can listen to it offline
- The plus sign automatically adds it to your library (bottom right)

...and there you have it!
You've successfully learned
how to make a new playlist,
search for music & podcasts,
and curate your own library
of sound.

Happy listening :)
